SOUTHPORT CONNECTOR EXPRESSWAY PROJECT DEVELOPMENT & ENVIRONMENT STUDY

EARLY 2025

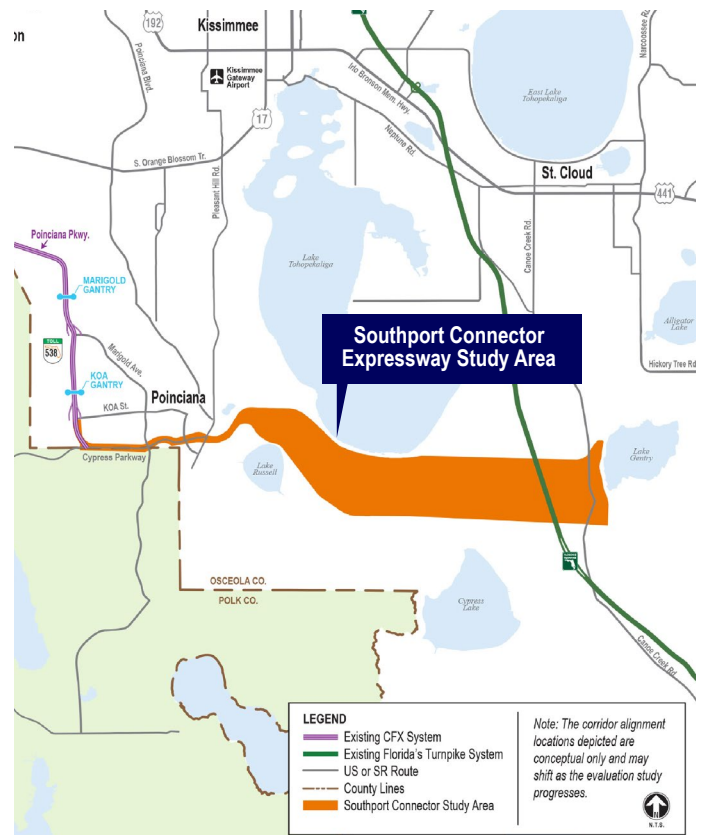

Osceola and Polk counties are growing rapidly, with communities like Poinciana leading that change. The Central Florida Expressway Authority (CFX) is working with local leaders to find ways to relieve traffic congestion resulting from Poinciana's rapid growth.

CFX is proposing the Southport Connector Expressway as part of a series of new roadways to help Move Poinciana. The proposed expressway would be part of a regional solution for easier and more efficient travel - including making it more convenient to get to Interstate 4 and Florida's Turnpike.

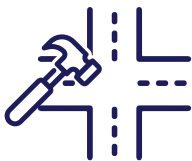

STUDY DESCRIPTION

- CFX would widen Cypress Parkway to six lanes to help relieve traffic backups, making travel easier and benefitting everyone.
- Elevated expressway in the middle of Cypress Parkway would let people making longer trips get to their destinations more quickly. That also would mean less traffic on the local road.
- Based on community input, CFX is looking at building the elevated expressway on bridge structures, which would maintain more open, community views; on fill dirt with retaining walls; or a combination of both.
- Cypress Parkway would be improved for pedestrians and motorists alike.
